Board's report on internal control and risk management pertaining to financial reporting

The Board's responsibility for internal control and risk management is regulated in the Swedish Companies Act and, for Swedish limited liability companies whose shares are available for trading on a regulated market in Sweden (currently Nasdaq Stockholm and NGM Equity), also in the Swedish Code of Corporate Governance. In addition to the rules in the Swedish Code of Corporate Governance regarding information about corporate governance, the rules of the Swedish Annual Accounts Act on corporate governance reporting also apply to companies whose shares are available for trading in a regulated market. Thus, INVISIO Communications is not formally bound to the Swedish Code of Corporate Governance or the rules of the Swedish Annual Accounts Act on corporate governance reporting, since the Company's shares are not available for trading on a regulated market, although the Code serves as an important reference for corporate governance within the Company. According to the Swedish Annual Accounts Act, the corporate governance report shall include information about the most important features of the Company's systems for internal control and risk management with respect to financial reporting.

Internal control and risk management with respect to financial reporting are part of INVISIO Communications' overall internal control and risk management and comprise a central component of the Company's corporate governance. INVISIO Communications defines internal control and risk management as a process that is influenced by the Board, the Audit Committee, the CEO, other Company management, and other employees and that is designed so as to provide reasonable assurance that INVISIO Communications' goals are achieved with respect to suitable and effective operations, reliable reporting, and compliance with applicable laws and statutes. This process is based on a control environment that fosters discipline and structure for the other four components of the process – risk assessment, control structures, information and communication, and follow-up. The process is based on the framework for internal control issued by the Committee of the Sponsoring Organizations of the Treadway Commission (COSO), www.coso.org.

Board's report on internal control and risk management pertaining to financial reporting can be found below and gives information about the most important features of the Company's systems for internal control and risk management with respect to financial reporting. This report has been audited by the Company's auditor.

Internal control and risk management with respect to financial reporting are aimed at providing reasonable assurance regarding the reliability of the external financial reporting in the form of interim reports, annual reports, and year-end reports and ensuring that the external financial reporting is prepared in accordance with law, applicable accounting standards, and other requirements on listed companies.

CONTROL ENVIRONMENT

The control environment encompasses the values and the ethics that the Board, the Audit Committee, the CEO, and other members of management communicate and adhere to, as well as the organizational structure, leadership, decision-making channels, authority, responsibilities, and competence held by the employees. An overview of the Company's organization, governance, and control – including external and inter-

nal governance documents that are important aspects of INVISIO Communications' control environment – is provided on page 32 in the Corporate Governance Report. INVISIO Communications is characterized by a comparatively lean and decentralized organization with clear responsibility for the respective business area managers who, together with the CEO, comprise company management.

The Board has overarching responsibility for internal control and risk management with respect to financial reporting. The Board has adopted a Work Plan for the Board of INVISIO Communications that forms an internal governance document. This document stipulates the Board's responsibility and regulates the internal division of duties among the Board, its committees, and its members.

The Board has appointed an Audit Committee, comprised of all board members, tasked with and responsible for monitoring the Company's financial reporting and, in this context, also monitoring the effectiveness of the Company's internal control and risk management. The Audit Committee shall also stay informed about the audits of the annual accounts and the consolidated accounts, examine and monitor the external auditor's impartiality and independence and therewith pay particular attention to whether the external auditor provides the Company with services other than auditing, and assist with the preparation of proposals for the AGM on decisions regarding the choice of auditor.

The Board has also established internal governance documents in the shape of a set of instructions for the CEO of INVISIO Communications, as well as instructions for financial reporting to the Board of INVISIO Communications.

As regards financial reporting, responsibility for maintaining an effective control environment and for the ongoing work on internal control and risk management is delegated to the CEO. The Company's CFO works under the direction of the CEO on continuously developing and improving the internal control and risk management with respect to financial reporting – on the one hand proactively with a focus on the internal control environment, on the other hand by quality assuring the external financial reporting. In 2014, INVISIO Communications continued the review of internal governance documents in order to ensure that they meet the Company's current needs and are in compliance with laws, applicable accounting standards, and other requirements on listed companies. As a result of this review, several internal governance documents have been updated. In addition to this, the focus in 2014, as in 2013, was on effective financial governance and control in the form of follow-ups of targets and plans and clear divisions of responsibility for income and expenses.

Risk assessment

As regards financial reporting, INVISIO Communications' risk assessment is designed to identify and evaluate the most significant risks affecting internal control with respect to financial reporting. Risk assessment provides a foundation for decisions on how risks are to be managed using various control structures, with the aim of ensuring that the basic requirements of financial reporting are fulfilled. The risk assessment that has been performed shows that the most significant risks for errors in the financial reporting pertain primarily to the fair valuation of intangible assets in the form of capitalized development costs, inventories, and trade accounts receivable. As per December 31, 2014, the assessment is that the reported value of these items corresponds to their fair value.

The Company's risk management is described further in the Board of Directors' Report and in Note 2.

CONTROL STRUCTURES

The most significant risks identified with respect to the financial reporting are managed using various control structures to ensure that the basic requirements of the external financial reporting are fulfilled. These control structures include both overarching and more detailed controls designed to prevent, discover, and correct errors and deviations, and which can be both formal and informal in nature. Areas covered by the controls include authorized approval of business transactions, the reliability of business systems, compliance with laws, applicable accounting standards, and other requirements placed on listed companies, and areas that contain significant elements of estimation.

INFORMATION AND COMMUNICATION

As regards financial reporting, information and communication about internal governance documents are available to the Company's employees in INVISIO Communications' document management system, High Stage. High Stage is a web-based tool for managing business documents in a central database and features automatic version management as well as control of authorization, reviews, and approval. Information and communication on internal governance documents are also provided in connection with staff meetings.

As regards financial reporting, the CEO and the Company's CFO report the results of their work on internal control and risk management at Audit Committee meetings.

External financial reporting is conducted in accordance with laws, applicable accounting standards, and other requirements on listed companies, as well as in accordance with relevant internal governance documents, such as the Finance Handbook, instructions for financial reporting to the board, and the Information Policy.

FOLLOW-UP

Follow-ups to ensure the effectiveness of internal control and risk management with respect to financial reporting are conducted by the Board, the Audit Committee, the CEO, and other management. This includes follow-ups of the CEO's business reports to the Board, of monthly financial reports against targets and plans, of any reports from the CEO and the Company's CFO concerning identified shortcomings in internal control with respect to the financial reporting, and of reports from the Company's auditor.

INVISIO Communications does not have a dedicated internal audit function. The Board has evaluated the need for such a function and has concluded that the organization's size and the scope of operations do not warrant such a function.

AUDITOR'S REPORT ON THE CORPORATE GOVERNANCE STATEMENT

To the annual meeting of the shareholders of INVISIO Communications AB (publ), corporate identity number 556651-0987

It is the Board of Directors who is responsible for the Corporate Governance Statement for the year 2014 on pages 32-41 and that it has been prepared in accordance with the Annual Accounts Act.

We have read the corporate governance statement and based on that reading and our knowledge of the company and the group we believe that we have a sufficient basis for our opinions. This means that our statutory examination of the Corporate Governance Statement is different and substantially less in scope than an audit conducted in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden.

In our opinion, the Corporate Governance Statement has been prepared and its statutory content is consistent with the annual accounts and the consolidated accounts.
